How can the Global Scale of English help you?

Take the guesswork out of student progress

The Global Scale of English (GSE) is the first truly global English language standard, allowing teachers to measure learner progress more accurately and more easily.

Based on research involving over 6000 teachers from more than 50 countries, it extends the Can Do statements of the Common European Framework of Reference (CEFR) to support teachers of different learner profiles: Adults learning General English, Academic English and Business English and Young Learners.

The numerical scale from 10 to 90 enables teachers and learners to understand more about language proficiency within a CEFR level.

The GSE helps learners answer these key questions:

- How good is my English?
- Am I progressing?
- What do I need to do next?

In this catalogue, you can see the GSE and CEFR levels for each course, and learn more about how the GSE underpins everything we do.

Save time on planning, gain time for teaching

Created in collaboration with thousands of teachers from around the world, the Global Scale of English Teacher Toolkit is a free, online database that brings together learning objectives, grammar and vocabulary in one place, all mapped to the GSE and CEFR.

The GSE Teacher Toolkit's functionality makes it quick and easy to search for the most level-appropriate content to support lesson planning and adapt curricula to meet students' needs.

Choose from academic, general and professional English, adults or young learners, and select the relevant level or skill. The GSE Teacher Toolkit enables teachers to find the most appropriate learning objectives and map them to their curriculum, identify gaps, measure learner progress, then provide meaningful feedback.

The framework of learning objectives provides an invaluable resource to create or review a curriculum. Ministries of education and large institutions are adopting the GSE to underpin new curriculums, and to raise standards in teaching and learning English.

New for 2021

We've made it even simpler to find the right learner resources.

Alongside learning objectives, grammar and vocabulary in the GSE Teacher Toolkit, check out the most appropriate course, graded reader, dictionary, and grammar related to your specific search.

To complete your journey through the GSE teacher toolkit, we have now included Pearson assessments, so you can find the right assessment to suit your learners' needs. And as an added bonus, Text Analyzer is a brand new feature to help you analyse the level of any piece of text, saving you time and effort in selecting content for your classes.

Simply add the resources you are interested in to your Wishlist and send this to your local sales office to receive more information and request samples.

Pearson Assured English

Institutions that have aligned their English programs and assessments to the GSE can now become accredited as a Pearson Assured English institution. This accreditation enables you to use the Pearson and GSE branding in your promotional materials and to award certificates of completion to students at the end of a Pearson Assured English course.

Let's work together

Whether you're looking for something fresh for a Primary class, or seeking to motivate teenagers, working on business English or preparing students for exams, we're here to help, with teaching and learning resources aligned to the GSE and linked to assessment solutions.

Once again, our thanks go out to the thousands of teachers and specialists who review material, answer our questions and shape what we do. Our products reflect their expertise.

Now I Know!

Children love asking questions

Now I Know! builds on children’s natural curiosity, as they answer questions about the world around them.

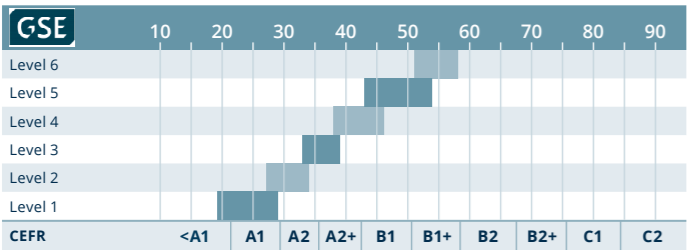

There’s a challenge in every unit, taking learners through a staged process of inquiry, finding out and looking for clues, supported by varied real-world content from BBC video.

Creative tasks all have clear goals, helping teachers to guide progress, and children and their parents to see and celebrate achievement.

Questions in the classroom.

Anyone who has spent time with a young child knows about inquiry-based learning!

It’s easy to feel overwhelmed when you have a class full of children, all with different interests and questions. So, how can we handle questions in the classroom?

Let’s look at how a lesson on adjectives of description looks, following the inquiry-based approach.

Ask the question ‘How are we all different?’ and ask students to think about people they know. Then ask them to think about other people: the person who drives the school bus, or serves them in the supermarket.

Then build on that: who do they like being with and why? Why not? This can be done using quite basic language; ‘I like her. She’s good.’

Then we can present new adjectives like ‘grumpy’ or ‘chatty’.

Do they know someone chatty? What do they chat about? And someone grumpy? Why might they be grumpy?

In **Now I Know!** we have a story about a neighbor who seems grumpy but is actually hard of hearing.

Our language goals are the adjectives but children are thinking about people, analyzing and reflecting. They are also addressing important values such as compassion.

It’s satisfying to make students aware of what they’ve learnt and bring the topic to a conclusion, with a project or a presentation. We also want them know that we can add to our thoughts or change our minds. The topic is still open to inquiries!

Teaching with STEAM

A STEAM challenge can be adapted to exploit language learning at the same time.

When planning an engaging STEAM (Science, Technology, Engineering, Art and Maths) lesson for your students there are several steps you can follow.

For example, for a lesson on toy-related vocabulary, ask learners to identify ramps around the classroom. They should point and shout out, "A ramp!". Note that ramps could simply be a piece of cardboard against a wall or a book slanted against a bookshelf.

Next, introduce the challenge: "Can you make a ramp for a toy car to travel 20 inches?" Explain that you are going to make a prediction. Ask the students, "How far do you think this toy car will travel?"

Ask learners to draw a sketch of their ramp. Monitor and ask questions.

For example: How many books are you going to use for the base of your ramp? Will it be high or low?

After this, ask your students to create and use their own ramps. Test and record their results, and present them to the class. Ask questions and elicit answers such as: How many times did you have to modify your ramp for the car to travel 20 inches? "We tried many times."

Take time to evaluate the activity with your learners. Was it easy or hard? What did you like/not like about the challenge? As an extension, have groups rotate to a ramp built by another group to try the experiment with other toys.

How do you encourage your students to use their imaginations?

Creativity is one of the most important Future Skills – and also one of the most misunderstood.

Contrary to popular belief, creativity is not just about coming up with ideas. It's also about evaluating and improving existing ones, and brainstorming multiple solutions to problems. What's more, it includes understanding real-world limits when developing new ideas and then elaborating on those ideas and outlining the smaller steps which will make them possible. Traditionally, academic success was measured on the ability to recall and repeat information – meaning that creativity was often not given the space it deserved in education.

But today, educational systems are changing to meet the future needs of learners who will need essential skills such as creativity, collaboration and critical thinking.

There are lots of ways we can encourage students to use their art and design skills in the classroom. One of the most effective is to use the course materials you are covering to generate ideas for presentations. This will further engage your students and develop digital literacy, as they will need to identify facts and form opinions about what they are reading.

Language doesn't always have to be presented and practiced in the same way and vocabulary doesn't always have to be written in a list. Allowing students to develop their own systems and categories for recording language is another positive step towards both creativity and critical thinking.

Asking 'Big' Questions makes a difference

Give meaning to your lessons via a Big Question

In one class, I saw that students were reporting their progress regarding plants they were growing. They analyzed the factors behind the growth of some of their plants and behind the fact some of the plants did not make it through the weekend. Then they discussed photosynthesis and were talking incessantly, raising their hands, practically jumping off their seats. They interpreted charts and drew conclusions.

All the teacher did was give meaning to her lesson via a Big Question. The lesson was relevant, was meaningful, and though children struggled with words, the cascade of ideas and opinions they wanted to share was unstoppable. What a difference a Big Question had made.

Big Questions are open-ended; have no simple "right answer" and no "yes/no" answers. They are meant to be investigated, argued, looked at from different points of view.

A Big Question makes you think; it makes you bring your previous experience and knowledge to the discussion. A Big Question may not have a unique, correct answer, but any answer that is the result of a collective construction of knowledge will have fulfilled its purpose. We will always have something personal and relevant to say in response to a good Big Question.

A Big Question makes me look for evidence to support my ideas. And that kind of depth of knowledge and rigorous thinking is what we as teachers should strive for in any classroom.

Navigating a universe of digital choices

Does technology always make our lives easier?
Well, it depends!

Not everyone knows how to use every type of device and application. Not all apps are useful for learning. Both users and institutions are constantly trying to find ways to protect their privacy online. And when not used properly, technology can even be a distraction to learners in the classroom.

But with proper preparation and implementation, technology offers a universe of advantages not only to learners, but to instructors as well. Here are just a couple of examples:

Personalization: Instructors can set individual learning pathways for students based on their needs, interests, or levels of proficiency. Learning tools allow us to assign tasks, perform

ongoing assessments, view and analyze results far more efficiently than paper-based examinations. This helps us make key decisions in order to improve each learner's experience.

Digital literacy: Digital tools don't only provide opportunities to study language, but to use language. Through the use of social media tools, learners can connect, collaborate, and problem-solve with other learners. As students move toward their prospective jobs and careers, knowing how to use digital tools to accomplish tasks is a necessity for most of us in the 21st century.

Teaching online: the first steps

In an online lesson, teacher talk is the same as in the physical classroom. One issue with online learning, is that rapport and engagement can be harder to achieve. For that reason, it's a good idea to keep teacher talk to a minimum.

Most platforms should have an interactive whiteboard. You can use this and share your screen via your platform so students can see it. You can use the whiteboard for exactly the same things as you do in the classroom.

One real benefit of online learning is the chat box. If your students are able to write in English, they can all type an answer into the chat box. This allows you to assess the understanding and ability of all students and not just one or two. It also ensures that learners are participating in the lessons, and engaging with the material. With smaller groups,

you might ask learners to share their ideas on the whiteboard. You also have the option to nominate a student to speak using their microphone.

Breakout rooms are a fantastic way to enable pair and group work in an online lesson. You can also hold pair work activities without breakout rooms, but the students not talking will need to be given a task (assessing, listening for key vocab, agreeing, disagreeing etc.) which they can complete in the chatbox. If you don't have the benefit of breakout rooms, another option is for speaking practice to be done outside the lesson for homework.

How to deliver an engaging online lesson to teenagers

Teaching online does take a little time and effort to set up but you can learn the ropes very quickly.

And once you learn all these skills, they will be useful in planning and delivering even more engaging and effective face-to-face lessons to your teenage students.”

Teaching online along the ESAP framework

Teaching online can be much easier and more efficient to plan and deliver when we follow four stages - **Engage, Study, Activate and Practice (ESAP)**.

This methodology relies on the corresponding face-to-face lesson stages and transfer them into varied interaction opportunities. Digital tools and solutions available with our secondary courses are key in this process.

International learning community

Teenage students and their teachers have this unique opportunity to join **Pearson and BBC Live Classes** and attend an interactive online lesson with other learners and educators from across the globe.

The current edition is available in two different formats - as **Live Classes** for groups, or **Big Live Lessons** for individual students, to make the learning experience live regardless of the learning scenario.

The project has been announced a **winner of 2020 British Council ELTons award**, in Innovation in Learner Resources category.

When teenagers need motivation, teachers need a hand

GoGetter provides multimedia resources, quirky grammar animations and authentic BBC content that are fun and educational.

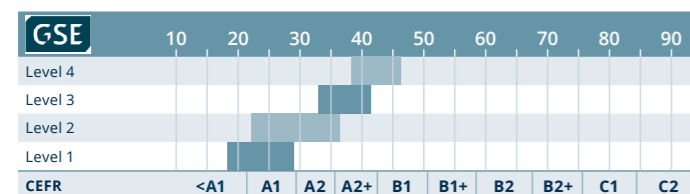

The course has been designed to motivate young teenage learners to use their time well and achieve measurable progress, supporting them with valuable Assessment for Learning strategies along the way.

GoGetter creates a supportive and positive learning environment through its step-by-step approach to teaching grammar. New grammar structures are illustrated by meaningful examples and practiced through staged activities to improve understanding and retention of a new language.

How to choose the right video for your learners

There's nothing quite like a video to grab a teenager's attention in the classroom. Well chosen videos can be fun, motivating and educational – and are often a welcome break from more traditional classroom activities.

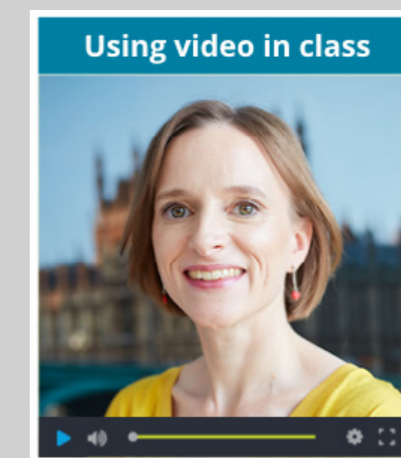

It's important to select your video material carefully, considering the age, language level and interests of your students. Younger learners tend to respond to cartoon-like videos with stories or fun characters, while teenagers and adult learners are more likely to be interested in documentary style films, humorous videos, or content that relates to their interests or work.

You can also watch a video training series by Amanda Davies where she shares her practical tips and ideas on using all types of GoGetter videos in class.

Of course, it's also important to consider how advanced your learners are when selecting content – if the video content is too complex your learners will find it hard to understand and might lose motivation and interest. Conversely, if it's too easy, they'll also get bored.

How to motivate and engage students with authentic video

In the old days, video could motivate and engage a class because it was something relatively new. What about nowadays, when video has gradually moved from a 'nice-to-have' element of new courses, to a 'must-have'?

Teenagers have grown up with a smartphone in their hand. They live their lives through video - filming themselves or one another, uploading and sharing video content on TikTok, accessing YouTube on a variety of devices, and even aspiring to be like the YouTubers they spend hours and hours watching.

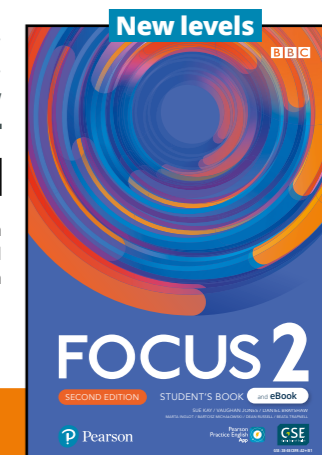

The importance of this to the way we teach is summed up by this quote from *The Age of the Image* - "We can't learn or teach what we can't communicate - and increasingly that communication is being done through visual media."

But in terms of what we watch in class, our videos need to work harder than before. In my experience, students won't tolerate boring or unnatural videos, just because they're in English. Because they watch so many online films, documentaries and series, students are used to high production values, strong narratives and authentic material.

Sue Kay,
Vaughan Jones,
Daniel Brayshaw

BBC

Developed in association
with BBC Studios and
BBC Learning English

All this increased volume and choice of video is great, and video certainly still has the power to motivate our students, but I believe we teachers and materials providers need to focus more on the quality of the videos we use in class than the quantity.

In **Focus Second Edition** you can motivate and engage students with authentic video content from the BBC. Throughout the course learners will not only practice and improve their language skills, but also develop important life skills that will prepare them for the future.

Pearson and BBC Live Classes

What are Pearson and BBC Live Classes?

Pearson and BBC Live Classes is a **unique worldwide project for teenage students and their teachers**.

In an exciting **partnership between Pearson and the BBC**, the *Live Classes* give students a unique opportunity to enter an **online language classroom**. English becomes so much more than a classroom subject – it's an essential tool to communicate with other students from all over the world.

The project is free and equally available to every group and encourages different nationalities, races, religions to come together in an international project. The students not only speak English and improve their communication skills, but they also get to know each other, learning respect and tolerance of diversity.

What are we offering in 2020/2021?

Whether your English lessons take place in the classroom or online, you can choose between two alternative formats of the lessons – *Pearson and BBC Live Classes* or *BIG Live Lessons*.

LIVE CLASSES for groups

A fully interactive online experience for around 10 groups of **students joining the lesson with their teacher at school**. This type of lessons is recommended for learning taking place face-to-face, in class, as allows students to see and interact with each other in the live environment.

BIG LIVE LESSONS for individual students

An alternative to *Live Classes* for individual **students joining the lesson on their own, at home**. This type of lessons is recommended for distant teaching, as a solution for schools and students during lockdown period.

Who is the project for?

The project is available to **all teenage students and their teachers across the globe**.

Students, who:

- are between 9 and 19 years old
- are eager to communicate in English
- need to be motivated and engaged
- want to meet students from other countries

Schools, which:

- have good Internet connection
- are equipped with a laptop and a projector, or an interactive whiteboard
- can fit the lesson into their timetable

How to join the project?

Here are three simple steps **teachers need to follow** to join the project:

- 1 **CHOOSE** the best lesson for your group, considering your students' age and level at english.com/liveclasses
- 2 **REGISTER** your class at registerliveclasses.com
- 3 **FOLLOW** the instructions you receive in the confirmation email to prepare for the lesson in advance

1. Students gain a unique chance to enter a global project.

2. Students have an opportunity to interact with other teenagers from around the world.

3. Students get a chance to explain their reality, learn tolerance and respect to diversity.

4. Teachers provide an authentic, motivating learning experience to their students.

5. Teachers can innovate their teaching methods for online and offline classes.

6. Teachers can make relationships with other groups worldwide.

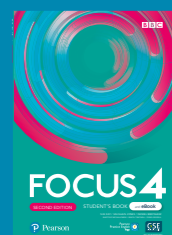

7. Schools gain kudos by participating in a unique, international developed by worldwide leaders in education and media – Pearson and the BBC.

8. School authorities can further develop their reputation in the eyes of Ministry officials, parents and future candidates.

9. Everyone can benefit from high-quality learning experience and good fun.

10. Everyone has a chance to join our worldwide learning community to use English outside the classroom.

2020/2021 lessons have been inspired by:

Over **10.000** students have joined Pearson and BBC Live Classes by now

Most teachers rate the project excellent

Nearly **700 schools** from 39 countries attended the project so far

We have run **150** Live Classes between 2018 and 2020

WINNER of 2020 British Council's ELTons award in *Innovation in Learner Resources* category.

How teachers can model leadership skills for their students

Leadership skills are in demand nowadays, and they are not just for 'the boss'. Workplaces are becoming less and less hierarchical, and as people are more likely to work in small teams, a greater number of employees need to possess leadership skills.

As teachers, we can play a key role in helping students to develop these skills. I would argue that we can demonstrate this to them by showing how such skills are useful in working with others in the workplace and elsewhere through our own behavior.

Teachers do indeed have a variety of roles. These include resource, facilitator, listener, provider of feedback, assessor, organizer – to name just a few. Many of these roles are absolutely not about standing at the front and 'leading' the students off

down a pre-determined path. It is likely that those teachers who felt they weren't leaders preferred to see themselves as facilitating, rather than leading.

That said, there are many different ways to be a good leader. And they don't all involve being extrovert, charismatic and firmly in charge. It's just as important to be empathic, creative, flexible, supportive, patient, a good listener, tactful and even humble. All qualities of a great teacher.

Why teach learning strategies?

Learning strategies accelerate standard academic language learning for all students more effectively and efficiently.

Learning strategies are techniques for understanding, remembering, and using information and skills to master academic language and content simultaneously, as they do in **New Keystone**.

Learning strategy induction can help students by:

- showing them techniques for “how to learn”,
- developing their independence as learners,
- increasing their academic motivation,
- developing their awareness of their own thinking and learning processes.

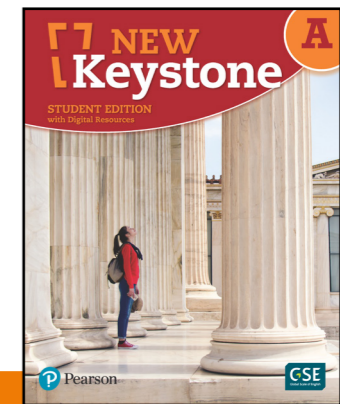

Research has shown that when students develop metacognition, the awareness of the learning process and strategies that lead to success, they are more likely to plan how to proceed with a

learning task, monitor their own performance, find solutions to problems encountered, and evaluate themselves upon task completion.

All kinds of fiction, poetry, and informational texts provide students with models of academic and literary language. However, to make full use of these models, students need to comprehend what they read. Reading strategies presented in **New Keystone** provide detailed instructions on how to apply the strategy to the text they are about to read.

General English

Let's support our learners in meeting their needs

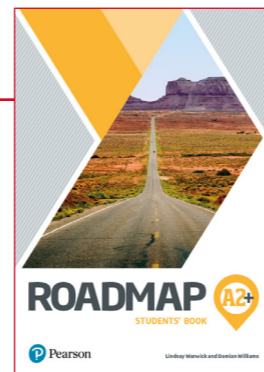

Contemporary adult learners require new approaches and materials that address new needs in their social, professional, and academic English. At Pearson we conduct research with teachers and learners to make sure that our courses meet those needs.

Pearson Digital English

Learn at your own pace

Pearson Digital English is a self-study online course that expands the opportunities institutions have to support their students. It enables students to study anywhere, to develop and practise their language, helping them to get ahead in English and in their careers.

“

The remote nature of online learning can affect engagement, make it harder to see whether learners are on task and... make speaking tasks more challenging to implement. The good news is that all the teaching techniques that you use in a face-to-face classroom are all still vital for online learning.

Having clear goals is essential

Learners have goals and those goals can change. Researchers and teachers have known for decades that goals are vitally important motivations in education in general and language learning in particular.

The Global Scale of English learning objectives provide a tool to understand learners' needs, pinpoint what they know and what they don't, and personalize learning and teaching to their goals.

Monitor progress with our assessment programs

Assessment

Motivate adult learners to reach milestones during their language courses. Whether it is to place them initially in a course level, measure progress, or certify their skills, teachers can help adult learners stay on track to achieve their goals.

Roadmap

The right route for every learner

Roadmap is practical and communicative, and gets students talking with topics and tasks relevant to their world.

Each lesson starts with a communicative goal, then builds the language and skills to achieve it.

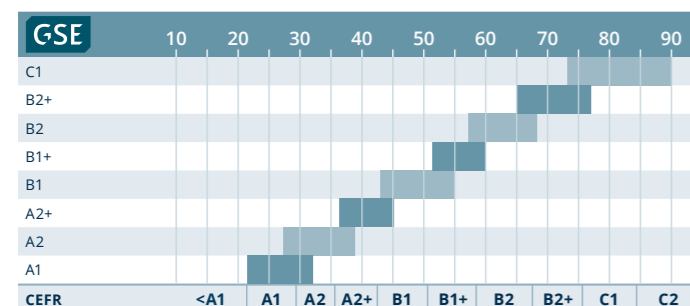

The unique twin-track approach allows you to adapt the material to your learners' needs and teach the language and skills they need to progress. So, in the fast-track route, every class covers essential language and speaking skills, while the extended route adds in-depth skills training in reading, writing and listening.

Comprehensive teacher support makes lessons easy to organize and fun to teach, however much time you have to prepare

Aim-oriented teaching: Planning ahead for success

Aim-oriented teaching involves planning a lesson by defining what students will be better able to do at the end of a lesson, so we see a set of priorities emerging. The most obvious is that communicative goals should be the primary driver of our lessons, with a consistent emphasis on fixed expressions, patterns, and routines, and a focus on general topics and developing range by going deeper into what students can already do.

If we teach towards communicative outcomes, then the best approach to adopt when planning classes is backward planning: identifying desired results and then designing activities that make these results happen. In other words, once you know the destination you're headed towards, it's easier to construct a straight route!

This was the approach we employed when writing **Roadmap**. We started a double-page lesson by selecting a relevant goal that we wanted

students to work towards. Next, we'd think of the actual conversations we'd expect students to learn how to have. We chose realistic models, analyzed the model texts for language and then wrote exercises for relevant new grammar and vocabulary that helps students achieve their goals, helping them to notice chunks, patterns, collocations, and so on. From here, we then build back up towards the final task.

Teaching online with StartUp

Dr Ken Beatty

Teachers and textbooks move with the times, and what these times now demand are online learning solutions. Fortunately, even for those students without a personal computer to use, **StartUp's** approach takes advantage of mobile phones as a platform for engaging with classes and as a tool for communicating, researching, and recording sound, photos, and videos.

Before trying online teaching and learning, many fear that it will be an impersonal experience. In fact, it is usually the opposite. In an online class with each student's video on-screen, it's like the entire class is sitting in the front row and everyone gets equal attention and opportunities to engage. StartUp provides interactive tools to help teachers offer more immediate assessments and feedback

for students. Teachers' and students' personalities shine through from the context of being at home, even among distractions of an occasional cat walking past a camera.

Imagine students facing difficulty with something they are learning, such as a grammar point. In a traditional classroom, students help each other and the teacher sits down and goes through the point, adding clarity. This still happens with online learning, but needs more of an effort for students who might otherwise feel isolated. Teachers need to make sure that students know help is available. **StartUp** has multiple digital resources, starting with the app with its videos and interactive grammar exercises, as well as additional exercises in MyEnglishLab and on the Teacher's Portal—reproducible masters that teachers can email students as pdfs. With **StartUp**, extra help is always available to those who need it.

Why challenge is good for building language

Speakout uses authentic material which really engages learners both cognitively and effectively. It is challenging for them - learning a language is difficult, and it's really hard to understand fast spoken English. **Speakout** supports them and builds their confidence in their ability to deal with spoken language. Learners enjoy the challenge, and they really enjoy the material because it is satisfying for them to know that the material hasn't been written especially for the language classroom. It feels more real

When teachers and students first start using **Speakout**, they often comment on this, saying that the course is more challenging than other courses at the level. We have found that ultimately both teachers and learners appreciate the challenge, that they feel better prepared for dealing with "the real world" than they would if they only had exposure to graded material. At the same time, within a level and a unit we vary the difficulty of texts so that some are relatively easily accessible to students at that level.

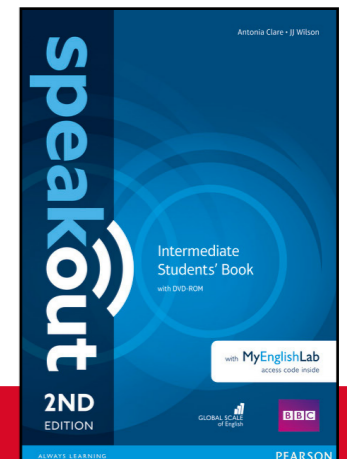

Our main focus is to get the students speaking and most teachers comment that their students talk a lot during the lessons (because they have something they genuinely want to speak about). They are given lots of opportunities to express their own ideas and opinions. Also, we try to give the learners really useful language, building their grammatical and lexical competence

Observe, practice, and remember

The English language classroom needs to serve as a place students can observe, practice, and remember new language. In other words, it has to provide a mini-microcosm of the English-speaking world and concentrate exposure and practice at a language level appropriate for students.

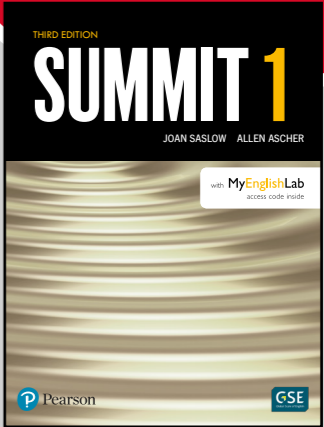

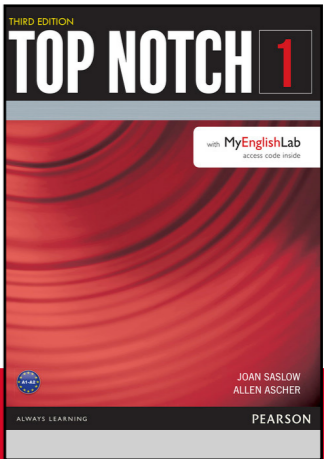

Our goal in creating **Top Notch** and **Summit** was to make English unforgettable by providing multiple opportunities to observe new language, plenty of receptive and productive practice, and deliberate and systematic recycling of that language long after its initial presentation.

We are told by teachers that what they love about the course is the naturalness and authenticity of the language used, and the emphasis we've put on social language and the idioms of everyday speech. English today is not an academic subject, as it was years ago where students would prepare mainly to read and write it, with grammar the most important focus. Today, English is a life skill for people all over the world, who use it as a lingua franca to function in business, study, and travel.

Preparing for the future

Research shows that students learn language when they use it to study something else in a sustained way. Sustained content study allows students to practice the critical thinking skills they will need outside of class: comparison, synthesis, and evaluation.

However, often exercises are called "critical thinking" when they aren't, in fact, teaching students to think critically. For example, when students are asked to express their opinions in a discussion. This is not necessarily critical thinking, as the heading might suggest. Or we see synthesis labels, but students are not made accountable for actually integrating texts.

NorthStar is rigorous about critical thinking. The higher-level cognitive domains outlined in Bloom's taxonomy provide the foundation for critical

thinking activities. Students learn to analyze by inferring meaning in texts, comparing and contrasting viewpoints, and organizing information into graphic organizers; they practice evaluating in activities by explaining and justifying their judgments, defending their point of view in a debate, and weighing pros and cons in an essay; they engage in creating throughout each unit by putting parts together to form a new whole, such as when they use new vocabulary creatively, synthesize information from two texts into a new text, and design projects at the end of each unit.

Cutting Edge

Spend more time practicing communication in class

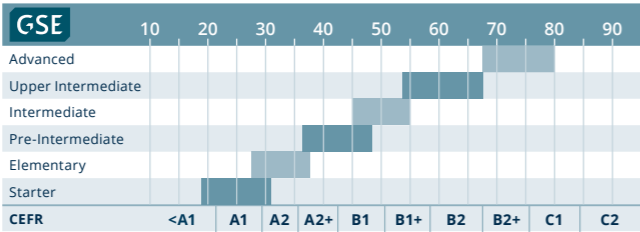

Cutting Edge uses a distinctive task-based approach that has made previous editions of the course so popular. Students learn the language they need and spend more time in class communicating. The contextualized practice of grammar and vocabulary makes the learning process more memorable and engaging. A wide range of contemporary topics and video materials help students discover English in the context of the modern world. Features such as Language Live and World Culture actively encourage students to expand their knowledge of global issues and participate in classroom discussions.

- Task-based lessons build confidence and develop effective communication skills.
- The discovery approach to grammar engages students.
- The emphasis on high-frequency vocabulary helps learners make fast progress.

How do language skills map to employability skills?

Pearson has created an online database that can help teachers quickly and easily identify the language needs for a variety of jobs and industries. Built using the US Bureau of Labor Statistics O*NET jobs database, the Global Scale of English (GSE) Job Profiles enable teachers to find the learning objectives that support the development of specific skills for a given job or set of roles. The GSE Job Profiles can be found in the GSE Teacher Toolkit and accessed at english.com/gse.

Skills beyond qualifications

Being employable is often considered to be based on having the right professional qualifications and work experience.

These elements are still essential, so what's new? Why do we keep hearing the term employability skills nowadays and what are the implications for the business English classroom?

The world of work continues to evolve: according to the World Economic Forum we are living in the era of the Fourth Industrial Revolution. Tough employment markets and rapid technological changes mean that employers are looking for candidates with specific combinations of skills whatever the position.

Some of the most sought after employability skills include: effective communication skills, working well in teams, having proven problem-solving abilities and showing initiative.

Business Partner is written with these skills in mind. There are dedicated communication skills lessons, projects and business workshops that develop (not just practise) these skills in every unit. Dramatized videos in the communication skills lessons encourage learners to reflect on the effectiveness of their own communication styles and the styles of others. Examples include push vs pull factors in influencing people and ways of giving and receiving feedback. Projects and business workshops offer opportunities for students to work on realistic case studies and show their initiative while solving business problems with their colleagues.

Business Partner helps students develop a marketable mindset at the same time as they develop and improve their English.

Find ways to motivate exam students during online lessons

Virtual classes pose unique challenges. To design successful lessons, teachers must find new, creative ways for students to collaborate with each other.

They need to help learners stay motivated from behind the screen, and give personalized feedback in real time from afar.

One of the ways in which online learning differs from face-to-face instruction is that students may find it more difficult to stay motivated. In an online classroom, there's less interaction with the teacher and less collaboration between students. Instruction is less focused on individuals, and lessons are not as personalized. Students are less likely to be taking notes or working in a coursebook, so there's no physical evidence of their learning.

As a result, students may be less motivated and feel as though they've made little progress towards a successful exam. This is why it's crucial for teachers to ensure students feel inspired to learn. As a teacher, you can try to incorporate some of the ideas listed:

- ease students into each class by asking how they are and talking about real-world topics,
- build intrinsic motivation by encouraging students to set their own goals so that they become less dependent on teachers and start learning for themselves.
- encourage students to collaborate when the teacher isn't available in order to discuss tricky exam items,
- give students reflection exercises, such as asking them to come up with three ways to improve a certain task,
- create a calendar of assignments or tasks for students to complete (with deadlines) so they see the progress they're making,
- make yourself available during virtual office hours to offer help, support and advice.

How to teach online with Gold Experience

Will you have to spend more time planning and sourcing your own materials? Or will you have to change the way you teach?

As many teachers make the transition to the online classroom, they wonder how they can access and teach the same coursebooks they've been using in class, online.

With **Gold Experience** 2nd Edition, moving to an online classroom is simple as the course is fully digital. All the resources are available to teachers and students through the Pearson English Portal and they can be easily accessed to create an engaging online experience for teenage students.

With so many resources available to teachers, the stress of planning online lessons is significantly reduced. This allows teachers to focus more on providing helpful feedback for exam students, and encouraging them to direct their own learning outside of the online classroom.

Find a balance during your exam course and meet the needs of all your students

Helping students to prepare for an exam can be extremely rewarding. There's a clear aim that everyone is working towards. We, and our students, can see the progress they make and at the end of the course we feel great when our students do well.

However, these days, not everyone on a course plans to take an exam at the end of it. So, how can we deal with this situation?

The most effective thing we can do is plan lessons based around sub-skills and not around test tasks. Backwash describes the effect that exam teaching has on classroom activities.

When the focus becomes too much about the exam, the real reason why students are learning English can be forgotten, producing negative backwash. Being able to underline key words in multiple choice questions and discern between distractors in a listening exam are really useful exam skills, but they don't help learners to communicate in the real world.

How to help your students meet their potential in their PTE General (Pearson English International Certificate exam)

Using print, online and blended materials in both physical and virtual classrooms, can help you achieve their goals.

With a mix of virtual classrooms and face to face instruction, we may need to use print, online or blended materials in order to support students in achieving their goals. To help each learner prepare efficiently for the PTE General (Pearson English International Certificate) paper based test, structuring teaching to be flexible and responding to different learning scenarios and student needs, is essential.

Compiling flexible content was at the heart of developing Practice Test Plus

for PTE General, so it can be used for either group instruction or as part of independent learning. It can be used in any order and be assigned as part of face to face or virtual instruction, as well as be used for self study.

The materials provide a balance between training tasks that walk students through each section of the test in Test 1, tips and advice in Test 2 and 3 clean tests for extra practice in Tests 3-5. And along the way students can use the carefully designed digital resources, to improve their skills and achieve their best results.

“Preparing young people to meet new contemporary challenges means reviewing and updating the pedagogies teachers use. Innovation at the level of practice must be seen as a normal response to addressing the daily challenges of a constantly changing classroom. Change is not an extra, but a pedagogical problem-solving process that builds on the creative, intuitive and personal capacities of teachers.

TELA

The Teacher Education and Leadership Academy develops Pearson’s professional learning programmes and resources for teachers.

Everything we do is aligned to the Pearson Teacher Competency Framework, an evidence-based body of work that defines what learner-centred K-12 teachers of all subjects should know and be able to do for the best learner outcomes. The framework provides the high-leverage indicators of success, while our courses provide the “how to get there.” Designed for busy teachers, all of our courses are built in small, easily digestible and engaging digital formats.

TELA Portfolio Overview

When you want to target critical skills exactly when you need them ...

General Methodology focuses on techniques and strategies for addressing classroom challenges, such as creating an interactive learning environment and meeting the needs of students with varied learning styles. Designed to provide you with the relevant skills, strategies and pedagogy to be successful in the global classroom.

Courses include :

- Classroom foundations
- Assessment

Whether you're new to online teaching and want a deep dive into the foundations, or you're ready for more advanced practices, or you're looking for tested methods of engaging your online learners ...

TELA Digital learning caters for teachers at various stages of the digital transformation process.

Courses include:

Digital literacy is for teachers new to the world of Technology. It provides participants opportunities to engage with the skills and tools needed to work on digital platforms worldwide as effective and responsible citizens.

Teaching with Technology provides participants with strategies and approaches for integrating technology into the classroom in a meaningful way.

Teaching for Impact: Best Practices for Online Teaching and Learning is all about growing confidence in the virtual classroom, helping connect teachers with their learners and choosing the right resources for a digital learning experience. Derived from 20 years of Pearson's Connections Academy authentic practice, TFI supports teachers to translate their passion for connecting with their learners to this new, virtual environment. It focuses on learner engagement and empowerment to build agency, perseverance, and a growth mindset.

Empowering teachers to make a difference in the lives of their learners

When you're facilitating professional learning for others in this new virtual world ...

Master Trainer for virtual facilitators prepares facilitators to deliver engaging, effective, and empowering professional learning in the virtual and blended environments. In 4, three-hour facilitated sessions, participants learn how to motivate and engage adult learners online, develop virtual sessions from a face-to-face design, give valuable and effective feedback, and manage all the details of this powerful and complex craft.

When you're looking for focussed English Language Teacher Development ...

TESOL Primary and TESOL Secondary provides training in approaches to language instruction, with a focus on increasing interactivity and student engagement.

Modules include:

- Increasing student speaking
- Scaffolding in ELT
- Pair and small group work
- 21st century skills
- Computer-led Instructional Learning

When you're looking to update, improve and enrich your teaching practice with an accredited qualification ...

Certificate for Practicing TESOL teachers (accredited by Trinity College) is open to both teachers with an initial teaching certificate/qualification and a minimum of 6 months' experience OR those teachers without a formal qualification but with a minimum of 2 years teaching experience.

Promoting the development of pedagogical knowledge and skills, the CertPT enables practising teachers, including those with language proficiency below CEFR level C1, to access specialist training and certification that can transform their teaching practice.

The CertPT is a Level 6 qualification, which is between an initial Level 5 teacher education certificate and an advanced Level 7 diploma qualification.

Courses include :

- CertPT in Teaching with Technology
- CertPT in Teaching Secondary Learners (13-18 years old) – focussing on developing Employability skills)
- CertPT in Teaching Young Learners (3-12 years old)

When you're looking to embark on an educational journey of authentic exploration, self-reflection and action ...

Diversity, Equity & Inclusion in the Global Classroom is designed to help educators to engage a range of anti-bias, multicultural and social justice issues and provide them with strategies and tools to help their learners understand, appreciate, include, and advocate for those around them.

When you're looking to prepare your learners to become effective global citizens ...

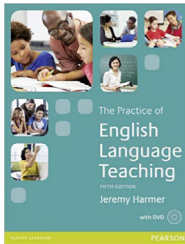

Global Citizenship supports teachers to build the skills of their learners most critical for employability and the rapidly shifting world. Our programme is designed to focus on Pearson's evidence-based Personal and Social Capabilities Framework consisting of:

- Critical & Creative Thinking
- Leadership & Collaboration
- Communication & Self-Management

At TELA we are committed to supporting you on your professional learning journey. Although the offerings in this catalogue are all self-guided, please contact us to find out more about our facilitated programme offerings.

The Practice of English Teaching

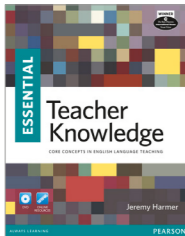

The essential guide for teachers of English

The Practice of English Teaching explains current pedagogy to teachers who want to access the most relevant ELT practices and incorporate them into their lessons. The fifth edition has been revised to reflect the latest developments in language teaching.

Twenty chapters provide a storehouse of information and ideas, while the DVD shows whole lesson progression and management, including interviews with teachers about how they structured their class and why.

The material addresses new topics such as the rise of CLIL, flipped classrooms, learner efficacy as well as the development of soft skills like critical thinking, intercultural competence, presentation skills, digital literacies, and other 21st century skills.

Our assessments provide the data and direction to support every language learning journey.

“

“We need different tests for different purposes on the journey to English proficiency.

We have developed tests to **Place** students in the right class, **Benchmark** their progress, **Certify** their achievements and **Verify** their English for high stakes purposes, such as university entry and migration.

Each test we produce is built with the input of teaching and assessment experts, and test takers themselves.

Our assessments can be used alongside any course, but work perfectly with Pearson English courseware. Underpinned by the Global Scale of English (GSE), this complete language learning system has the confidence of teachers and students around the world.”

English Benchmark Young Learners

Gamified, tablet-based assessment to measure young learners' proficiency and monitor progress

English Benchmark Young Learners is suitable for children age 6-14, and delivered via tablet. The test uses animation, graphics, photos, video and the principles of interactive game design to relax and engage young minds while evaluating English language skills in detail.

Automated scoring provides individual and group results in minutes. Individual reports give an overall score plus a breakdown for Speaking, Listening, Reading and Writing, and group reports give these as averages across the whole class.

The reports include useful recommendations for activities that will help address skills gaps. If you're following one of a range of Pearson English courses, you will also be directed to specific exercises that will help.

English Benchmark Young Learners can be used to prove young learners' English ability to parents, monitor learning progress and ensure your teaching is targeting the right skills.

It is available at six levels (<A1-B1+) and can be taken up to five times per level without repetition.

- Tablet-based and intuitive to use for young learners
- Stress-free testing inspires natural responses and so a more accurate result
- Recommended activities help target your teaching
- Share a certificate of achievement with children and parents

How can learners prepare?

One of the main advantages of the International Certificate is that there is no specific learning required for the exam. However, there are plenty of resources to help students familiarise themselves with the test, develop their skills and build confidence.

Warm Up

Warm Up is a free, fun and convenient app for those preparing for the International Certificate exam.

Test takers of all levels can build confidence by practising with real items from real past exams, across all four language skills. They can earn points and track their performance and practice time, making exam preparation enjoyable and motivating.

Download the app for **Android** or **iOS**.

Practice Tests Plus

This valuable resource helps teachers prepare their students for the International Certificate paper-based test, providing practice with all sections, as well as comprehensive guidance and strategies. You will also find tips for the computer-based test, too.

The four-level series helps familiarise students with the task types and formats to help them achieve the best score in their exam.

Readiness Test

This quick, online test tells learners if they are ready to take their English exam at their chosen level

The Readiness Test is a powerful test that confirms if learners are ready to take an official English exam, such as the Pearson English International Certificate.

The online test is available for levels A2, B1, B2 and C1, and can be taken from home or school in about an hour. Minutes after the test is submitted, a Readiness Report is returned, revealing if learners are Ready, Potentially Ready or Not Ready for their exam. If they have more work to do, the Readiness Test will identify exactly what is needed to get them there.

Clear 'traffic light' indicators show an overall readiness status, plus a breakdown for Speaking, Listening, Reading and Writing. More detailed performance summaries are also included, overall and per skill, as well as recommended learning activities to address any identified skills gaps.

If you're teaching using a Pearson English course, the report also points to specific exercises that will develop the required skills. Select your course from **Speak Out**, **Business Partner**, **Gold Experience** and **Wider World**.

Pearson English International Certificate – Young Learners

(PTE Young Learners)

A fun, motivating English language assessment for students aged 6 to 13

The Pearson English International Certificate - Young Learners tests a young learner's ability to use English in realistic contexts.

Later in the series, the tests assess learners' ability to use language to carry out specific communicative tasks, with an emphasis on real-life scenarios rather than on knowledge of specific language items and vocabulary.

Within a stress-free testing environment, the International Certificate - Young Learners includes name-to-picture matching, story-writing, and participation in a conversation, plus a group spoken section that is conducted while students play a board game. Engaging and familiar content follows the adventures of the Brown family across all test levels.

All young test takers receive a certificate and a candidate performance report, including a breakdown of the scores for Speaking, Listening, Reading and Writing.

- Fun and stress-free, eases young learners into a testing environment
- Qualification awarded by Edexcel, the UK's largest examining body
- Certificate for every test-taker
- Focus on authentic scenarios

What English is needed for academic purposes?

Authors, editors and teachers are aware of the need to be learner focused and to create syllabuses and courses that reflect learner needs and expectations. The GSE Learning Objectives for Academic English constitute a detailed and graded model of student target performance across a range of skills and domains relevant to the study of English for Academic Purposes.

Bridging the gap

Studying abroad in an English-speaking country can be a daunting prospect for many students while also a fantastic opportunity for students to use their language skills in real-world situations and give their confidence a boost. But how can we help prepare them for success, so that they can really benefit from their experience abroad?

One way to do this is to develop their academic skills alongside their language skills. Academic skills encourage students to become more efficient learners. They give students the confidence to participate fully in English-speaking courses and are invaluable outside of the classroom and after they graduate. These skills, which include critical thinking and note-taking, are also highly transferable, and therefore vital for success in any career.

The skills students are expected to have when they start in higher education can be organized into five main categories:

- **Academic Discourse** – skills communicating effectively in debates, discussions and presentations
- **Academic Text Strategies** – skills for analyzing academic texts in greater detail
- **Academic Strategies** – skills for understanding and responding critically to lectures
- **Composition** – skills for effective academic writing
- **Comprehension** – skills for understanding academic texts and lectures

University Success helps build these skills through its three strands: reading, writing, and oral communication skills, which are developed through studying a variety of authentic academic content; the sorts of lectures and texts they could expect to come across in their further studies.

Advance in Academic Writing

Authentic academic texts prepare students for further study

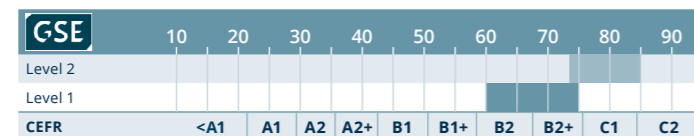

Advance in Academic Writing is designed to help students make a successful transition to college and university studies, where they need to write assignments in academic English.

It integrates active and critical reading, critical thinking, academic vocabulary building, academic writing style, and effective sentence structure and grammar around authentic academic texts. Students are taken through the research and writing processes they need to master to succeed in their studies.

- Authentic academic texts expose students to the type of reading they will encounter.
- Critical thinking covers in-depth analysis of the readings and the pitfalls of academic writing.
- Students develop vocabulary, grammar, and aspects of writing exemplified in the readings.
- Research skills, appropriate citation, and the more common citation styles are covered in detail.

Contemporary Topics

Realistic college lectures help build the skills students need for further study

Now in its fourth edition, **Contemporary Topics** expands on its highly respected approach to developing academic listening and study skills.

Organized around realistic college lectures, the text guides learners through carefully sequenced activities in skills such as note-taking, focusing attention, intensive listening, and vocabulary building. It also helps students evaluate their interests and explore possible career paths.

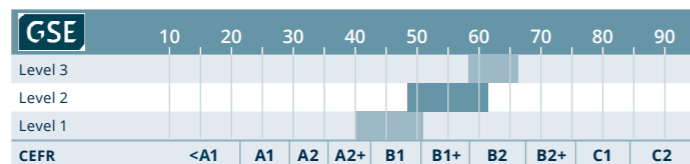

- Students are exposed to core academic vocabulary.
- Collaborative activities, presentations, and peer evaluations help students develop critical thinking skills.
- Unit comprehension tests assess students' understanding of the lectures.

New to this edition:

- New subject areas, presented as one-on-one academic lectures, emphasize professional applications, such as software engineering, multimedia design, information technology, urban planning, and social psychology.
- Learning outcomes listed at the start of each unit show students the unit's goals and what they will learn.
- New audio interviews with experts provide context for unit lectures.
- Bottom-up listening and pronunciation exercises emphasize important principles and improve real-time perception.
- An oral presentation activity, with preparation and delivery support, at the end of each unit includes the opportunity for peer evaluation.
- Proficiency assessments simulate the TOEFL-style test with short academic audio lectures and multiple-choice exams.
- Essential Online Resources include audio, video, and teacher materials.

Focus on Writing

Progressing through different writing techniques builds essential skills

Focus on Writing is an academic writing program that provides students with essential tools to master the key steps in the writing process, grammatical structures, lexical knowledge, and rhetorical modes essential for academic writing.

This five-level series progresses with students as they grow in confidence and ability from sentence level through paragraphs and essays. Each unit leads writers step-by-step through the process of pre-writing, writing a first draft, revising, and editing before producing a final draft. Students write an entire paragraph or essay in each unit, and also have plenty of practice at the sentence and word levels.

Listening and Understanding

A second language can seem so dizzying and random. A little information about its patterns can help students make sense of it and give them a foundation for language growth.

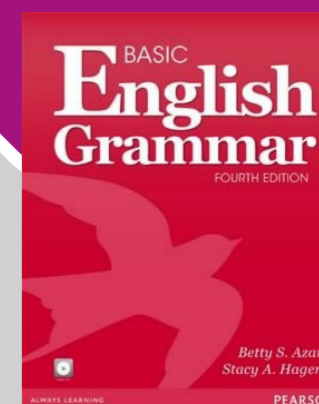

The first book in the Azar series was published in 1981. All of the texts have undergone revisions over the years with many evolutionary changes, especially in the use of more interactive and communicative activities. But throughout this time, the original vision remains: the development of all usage skills from a grammar base by giving clear grammar information and employing a variety of practice modes, from controlled response to open communicative interaction.

When I published the first book, I hoped maybe a few other teachers might find the textbook useful, too. In all honesty, I never

imagined there were so many teachers like myself who found a grammar-based skills approach to be effective and appropriate for their students. It turns out we are legion.

A great deal of current research shows that many if not most of our students benefit greatly from a grammar component blended with other approaches in a well-balanced program of second language instruction.

More and more programs teach grammar communicatively.

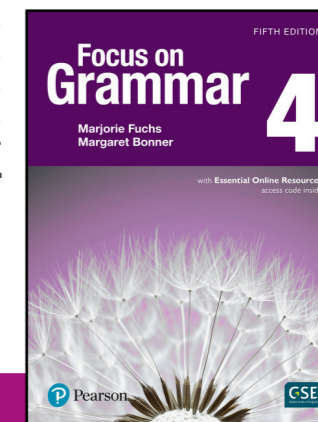

Teachers who use this approach introduce a grammar structure in a natural, meaningful reading, then present and practice the structure in context and end up by setting up authentic-like situations in which students interact meaningfully while incorporating the new grammar point.

The role of the grammar teacher has gone beyond that of a transmitter of information about the target structure and arbiter of what is right and wrong in discrete sentences. Instead, the communicative grammar teacher introduces interesting, often content-based themes, and assigns thoughtful tasks. She or he coordinates team, group, and class work, manages classes in which students are doing different tasks, and becomes a resource person who provides students with the best access to the best material online and offline. In addition, the teacher facilitates activities to make sure that all goes smoothly. Grammar is taught through an integrated skills approach—listening, speaking, reading, and writing are all a part of the grammar class.

Responsibility for learning is shifting from the teacher to the learner. Motivation is generally higher, and results are better.

Why *invest* in a Longman dictionary?

Definitions

Definitions are written using only 2,000 common words, so they are easy to understand, whatever your level. The most common meanings come first, so it is quicker to find the meaning you are looking for.

Academic Word List

Words from the *Academic Word List* are highlighted to help you focus on learning academic vocabulary, so you can understand academic texts better.

Example sentences

Corpus-based examples show authentic English, and how words are used in context, to help you develop natural English.

Collocations

Improve your fluency with the highlighted common word combinations and express yourself naturally.

Thesaurus

Synonyms have definitions and example sentences, helping you expand your vocabulary.

Grammar

Key grammar explanations help you write and speak correctly.

Frequency

The most important 9,000 words to learn in English are highlighted in red.

●●● indicates the top 3,000 words; ●●○ indicates the next most important words; ●○○ indicates the less frequent yet important next 3,000 words.

Academic Word List

This label indicates that a word is included in the *Academic Word List*. These are important words to know if you are studying or are writing academic assignments.

Spoken English

S1, S2, and S3 means that the word is one of the 1,000, 2,000, or 3,000 most common words in spoken English.

Improving English through the joy of reading

Written with carefully graded language, the extensive range of Pearson English Graded Readers bring the joy of reading to every English language student. These engaging titles provide a perfect balance of accessibility and challenge, helping students develop a wide range of vocabulary and improve their language skills in general.

Six reasons to love Pearson Readers

1 Enriching vocabulary

Carefully graded texts present new words in context, making them more meaningful and memorable. Through developing a wide vocabulary, learners can express themselves clearly and communicate effectively.

2 Succeeding in exams and beyond

Reading provides an extensive review of key grammar and learners experience English being used naturally and correctly. Learners have a better overall understanding and command of English, leading to improved exam results.

3 Extending learning experiences

From delightful children's favorites to classic novels, romantic comedies to exciting thrillers, the wide range of graded readers make some of the greatest stories of all time accessible for all learners to enjoy.

4 Widening knowledge

Fascinating non-fiction titles, classic literature and great works from contemporary authors develop readers' overall general knowledge, and their understanding of other cultures and the world around them.

5 Improving overall reading skills

Through reading extensively, learners improve their comprehension and the speed and fluency of their reading. As their confidence builds they become more independent learners.

6 Getting a complete teaching solution

- Readers are aligned to the CEFR and GSE.
- Downloadable notes, activities, worksheets and tests support teachers.
- Audio books available for most titles provide clear models for pronunciation.

*Pearson is committed to creating
a positive social impact.*

We help learners at every stage of the journey
discover a love of learning that will provide
opportunities throughout their lives.

Helping improve access to better learning is an
important part of this. With our global reach,
we're big enough to make change happen on
a global scale, and we're dedicated to doing the
right thing and inspiring others to do the same.
